The Kingdom of Plastic

Mixed media installation

2019

Dr. Rahmanu Widayat, M.Sn.

66

A response to the dangers of plastic use. Unattended and ignored, polluting and damaging the natural environment, people have not been able to stop the use of plastic to date. With the continuous use of plastic, plastic waste continues to pile up. This is what I interpret into visual language as an installation work. It is like living in a beautiful kingdom, but over time the kingdom is sinking, buried in plastic.
